

190i is designed for easy operation and with advanced features to meet the requirements of a wide range of applications like static & dynamic industrial weighing, piece counting, pre-packing, sorting & packing, shipping, scientific monitoring, peak measuring... etc. no matter as a standalone unit or incorporated in an integrated weighing system.

10,000e OIML Class III approval certificate proves that it is one of the world's most accurate class III weighing instruments and a qualified instrument for trade purposes, law enforcement and non-trade usages.

Extremely low (0,75µV) input per verification scale interval means **190i** is also good for high dead load and at the same time low load cell utilization applications. Dual weighing range and interval, plus many other approved functions make **190i** the perfect answer for many legal for trade and non-trade applications.

Equipped with high speed micro-processor, unsurpassed innovative program, new linearity compensation method, wide range of flexible and selectable operation parameters, **190i** is unexceptional fast, accurate and stable no matter for low or high resolution, simple to complicated applications even at extremely heavy workload.

Reliability and durability are safeguarded and guaranteed by the carefully selected components from renowned manufacturers as well as smart designed and well planned circuits.

190i always deliver more than it is expected and an excellent choice whenever & wherever performance, reliability and flexibility are of no compromise.
